Shining success

A look inside the final celebrations for CID Awards 2024: MENA

CELEBRATING THE BEST IN DESIGN, more than 100 of the region's leading industry professionals gathered in Rockfish at Jumeirah Al Naseem in Dubai on October 3 for the final festivities of the CID Awards 2024.

The event was held in partnership with leading surface supplier GLAZE and gathered the trophy winners and shortlisted people, projects and firms from CID Awards 2024: MENA to further celebrate their success.

GLAZE CEO Umesh Punia sparked the evening with a speech, praising the design community for its boundary-defying work, setting a new world standard.

CID's editor-at-large Holly Byrne then took the stage with a brief speech that congratulated this year's winners of the esteemed CID Award across various categories and sectors.

She comments, "This event was a continued celebration of excellence in design and it was a pleasure to see all of our winners

again, including the guests who are highly commendable leaders in their fields.”

The night was complete with generous guest giveaways, live food stations and a free-flowing beverage counter. Live singers sashayed the space while the DJ played late into the evening.

GLAZE is the leading natural stone supplier in the Middle East with over 20 years of experience in sourcing some of the rarest, most decorative stone from the world’s best quarries. Recent projects in major commercial spaces have seen GLAZE go from strength to strength as guests revelled in its success.

From exotic marble and onyx to granite, travertine, quartzite, and limestone, the business offers a one-stop shop for architects, designers and homeowners seeking premium flooring, wall and countertop solutions.

GLAZE maintains a tradition of introducing new quality standards in natural stones, unseen before in the Middle East. With over 500 colours and designs added to their collection, GLAZE not only offers variety but also enhances the overall customer experience with their state-of-the-art stone gallery.

The company’s market leadership is further demonstrated by their introduction of technically advanced engineered stones. Following the success of products like Neolith, XTONE, KOZO, Caesarston, and Coante, GLAZE continues to innovate, with more advanced engineered stones in the pipeline.

This year marked the 18th annual CID Awards: MENA, and was held at Madinat Jumeirah. As the leading commercial design title in the UAE, CID continues to recognise excellence in design across the Middle East and North Africa. •
